PROFILE SUMMARY:

Passionate Junior Web Developer specializing in user-centric design and responsive website development. Skilled in optimizing performance and integrating cutting-edge technologies. Committed to building scalable web solutions and adept at collaborating with teams to convey technical concepts to non-technical stakeholders.

SKILLS:

Expertise	JavaScript (ES6), React.js, JSON Web Token (JWT), REST API, React Hook Form, React Router DOM, Axios, Tailwind CSS, HTML, CSS, Shadcn/ui, Tanstack Query, Firebase, JSON, Stripe Payment Gateway
Comfortable	Node.Js, Express.Js, MongoDB, Sass
Tools	GitHub, VS Code, Netlify, Vercel, Chrome Dev Tools, Figma

PROJECTS:

Red Wave - Streamlining Blood Donation through a User-Friendly Platform. ➡ Live Preview ↗ Github Server - Client

A user-friendly blood donation platform powered by the MERN stack, facilitating seamless connections between donors and recipients while incorporating robust features for user management and role-based access control.

- Streamlines blood donation connections, enhancing efficiency with its role-based authorization system.
- A dynamic dashboard enhances engagement, allowing users to monitor donation requests, profiles, update profiles, payment history and blog posts.
- Secure fund donation via Stripe, complementing blood donation posts and blogs.

Technology Used - React, Node, MongoDB, Express, Shad/cn, Stripe, Tanstack Query, Axios, Firebase, React Hook Form, React Helmet Async, React Hot Toast, Sweet Alert, Swiper slider, Locomotive Scroll, lottie React.

Voluntree - Connect with volunteers or serve your community ➡ Live Preview ↗ Github Server - Client

Voluntree is a secure, responsive platform connecting volunteers with opportunities through intuitive post management and search functionalities.

- Voluntree simplifies post management, enabling easy creation, editing, and deletion of volunteer opportunities.
- Volunteers can seamlessly explore roles, apply, or cancel requests through intuitive browsing and searching, table and card view options, pagination, and light/dark mode ensure optimal viewing comfort and usability.
- Secure data fetching with sign-in cookies provides enhanced security and reliability for users.

Technology Used - React, Node, MongoDB, Express, JWT, Daisy Ui, Tanstack Query, Axios, Firebase, React Hook Form.

Rongmohol- Your premier destination for artistic inspiration ➡ Live Preview ↗ Github Server - Client

Rongmohol is a React-powered art platform for sharing, exploring, and engaging with diverse artworks.

- Users can add, update, and delete artwork, with filtering options available.
- Firebase integration ensures secure sign-in and personalized experiences.
- The platform features a responsive, user-friendly UI with light and dark mode options.

Technology Used - React, Node, MongoDB, Express, lottie React, React Simple Typewriter, Tanstack Query, Locomotive Scroll, Axios, React Helmet Async, Firebase, React Hook Form, React Hot Toast, Sweet Alert, Swiper slider
